Our Doctor of Education programme, offered since 1997, was the first of its kind in Hong Kong. It graduated its first group of students in 2001. The Doctor of Education programme is a professional doctorate that includes both coursework and research components. It offers a variety of relevant courses and supervised thesis research. The Doctor of Education programme aims to help experienced professionals to develop a deep understanding of their chosen areas of study, to encourage them in the search for innovative approaches to educational inquiry and practical insights, and to assist them in resolving educational problems.

The Doctor of Education programme is designed to suit the needs of professionals who seek to meet the challenges of educational change effectively and desire to have their work thoroughly grounded in the theory and practice of defined areas of study. Over the years, the majority of students admitted by the programme are school principals, senior teachers, lecturers and administrative staff in universities, and other professionals working for government agencies and social organisations. Their thesis studies have produced valuable indigenous knowledge to inform educational decisions and improve educational practices. The doctoral graduates are an important driving force in serving and leading our local / regional educational community.
